

Electronic Engineering Taster Days 2018/19

21 November 2018
20 March 2019

6 February 2019
22 May 2019

Electronic Engineering is at the heart of many systems we use every day including mobile communications, computers and gaming devices, transport systems and domestic appliances. Studying an Electronic Engineering degree at Royal Holloway will give you the skills and knowledge you need to contribute towards the systems of tomorrow.

Combining informative presentations with practical examples of the course, the taster days will be a fun and interactive experience for those interested in Electronic Engineering. There will be an introduction to the Electronic Engineering department with leading academics, support staff and student ambassadors.

You will do a practical circuit building workshop, giving you an idea of how you might put your degree course learning into practise.

Followed by the chance to explore the new Electronic Engineering department building and a campus tour led by our current students.

10am to 3pm

The Shilling Building
