Dear Parent/Guardian

### **Year 7 and 8 Computing – The iDEA Project**

The iDEA Project has been set for all homework tasks for every student in Years 7 and 8. We aim for every student, where possible, to achieve a Bronze Award by the end of Year 8. We are encouraging students to aim for the Silver Award if they believe they can achieve this.

Students have been advised that, if they wish to complete the Bronze Award in one year, they should aim to achieve a specific number of points each half term in order to do this. This is a lot of work, but some students will be able to achieve this within the single year.

I hope this settles your mind with regards to the homework tasks for Computing this year. Next year, we will be following the same project, so if your child is in Year 7, they will have the opportunity to complete their Bronze or Silver Award then. Students who wish to continue with this into their GCSE's may also do so.

Yours sincerely

Miss F Brooke  
Head of Computing
