

F1 in Schools

On Wednesday 26 February, two teams of STEAM students attended the F1 in school's regional south west final in Bristol and Bath science park.

The teams named MESY Seniors (Vismaad, Jude and Levi) and MESY Juniors (Nikita, Will and Elliot) competed against 15 other schools from the South West region in three classes. Mesy Juniors won their entry class overall claiming best engineered and fastest car. They also came 7th overall fastest car on the day. Mesy seniors claimed seventh overall in their class out of ten teams.

All the boys did a great job putting in a lot of effort and representing the school well having to face engineering and enterprise judging panels from industry representatives.

All have vowed to compete again next year and work has started already on next season!
