

A 'Level Photography September 2020

We hope that you have had a great couple of months creating your own creative Sketchbook / changed book inspired by the visuals and ideas that we have posted onto Google Classroom.

We are very much looking forward to seeing your sketchbooks / changed books in the first week back in September in your Photography classes.

Please ensure that you have created your book to the standard that reflects your ability and that it includes a variety of media and different styles and ways of working.

Please bring your sketchbook with you to your first Photography lesson.

Materials that you will require for your Photography Lessons in September.

Your own SD card to put into our cameras and your own card reader. [One like this would work.](#)

A3 black Photography sketchbooks are £8.50 and you can buy these from the Art Department. They last a long time and you might also need a couple of white writing pens to annotate your work. You will also need a glue stick and basic tools for learning.

Links to exhibitions, informative webpages and recommended viewing for Photography

Please **visit these sites** and **document** things that interest you by saving images or taking screen shots. You can print and include in a **sketchbook** or create a **digital presentation** on PowerPoint or Slides.

Write **why** you chose these images – what interests you about them?

We will use these for discussion in the first lessons back along with the work you produce from the transition project. (You will find this in the Google Classroom assignments.)

Photography

The photographic process allows an image to be reproduced using light.

This process has developed over many years to now enable **mass production** and sharing of images through magazines, posters, fine art pictures, advertising etc.

Photographic techniques include traditional (analogue) photography, digital photography and camera-less photography.

- **traditional photography** uses light-sensitive film negatives and light-sensitive paper to create an image
- **digital photography** saves images as files that can be manipulated on a computer

Whatever camera you use, it's useful to put on its **manual setting** rather than using it in automatic mode. This puts you in control of the **aperture, focus** and **shutter speed** which gives you more control over the final photograph.

Struggling to get your head round revision and exams?

Our team of exam survivors will get you started and keep you going.
