Dear Parent/Guardian

REVISION WEEK

Across the year we will have four themed weeks on revision, to support students in all year groups with their revision and recall practice.

This week is our first. We are introducing the topic of revision in assemblies and encouraging students to try a new strategy. Teachers will also be setting revision and recall tasks for homework this week, whilst discussing with students the best strategy for approaching this task.

We recognise that every student will develop their own approach to revision, below are some parent leaflets on how to support your child with using flash cards and chunking techniques.

We hope that you find these useful.

Yours sincerely

Mrs A Morgan
Senior Deputy Headteacher

The chunking technique

Information for parents and carers

Did you know?

Chunking is a technique which can improve the **memory**. Chunking is the process of taking individual pieces of information (**chunks**) and **grouping them into larger units**.

The chunking process encourages students to break down larger amounts of information into smaller units, identify similarities or patterns, organise information and group information into manageable units. Studies have shown that students have gone from remembering seven pieces of information to over 80 by using the chunking technique.

Research shows that chunking is useful because it can help students' memory system become far more efficient as they are able to retain information better. They will then be able to recall relevant information in their exams.

What can you do?

Support your child to **challenge themselves** to remember lists of things, whether it's a shopping list, vocabulary words or important topics they are learning about.

Help your child to **separate their revision into relevant sections** as this will help them digest everything and remember the information more easily. Encourage them to create links between different bits of information and put them into meaningful categories because it can help them remember them better.

Chunking works well if work is **organised and neat**, so help your child to use headings and titles

for different sections, use tables to summarise data, bullet points to summarise key points and also combine illustrations with text to create visual associations.

Using Flashcards

Information for parents and carers

PIXL
partners in excellence

Did you know?

Using flashcards is a repetition strategy. They are a simple 'cue' on the front and an 'answer' on the back. Flashcards engage students in "active recall", which means they are creating connections with their memory.

Research shows that using flashcards can enhance long-term learning and help students to memorise facts quickly. Flashcards are not an effective method for last-minute cramming!

Studies have found that it's more effective to review a whole stack of cards in one sitting rather than to carry them around and have students glance at them every so often.

What can you do?

Encourage your child to make flashcards as part of their revision strategy. The key is to have a question or key term on one side and the answer or definition on the other. Suggest using different colours for topics to help categorise information and to keep them neat. Flashcards containing just notes are not effective.

Try testing your child using the flashcards and give them time to digest the question before answering. If they get the answer right, don't discard the card – they need to keep repeating it again and over time.

When using the flashcards, help your child review their cards using a system. With your child, read

through this article which explains how to use flashcards effectively using a system approach: <https://www.parent24.com/Learn/School-exams/watch-how-to-study-using-flashcards-20160825>
