

10 July 2023

Dear Parent/Guardian

Year 7 into Year 8 - Mathematics Set Changes - September 2023

Students' maths classes are reviewed on a regular basis throughout Year 7 and the last review was back in February of this year.

In order to ensure students, make maximum progress in their final year of the Foundation course (Year 8), we feel it now appropriate to review classes and ensure students are learning in line with that of their peers. Therefore, we will be making some class changes from the start of September, and this will tie in with new timetables issued at the start of the new academic year.

There will be movement of several students from the groups they were taught in this academic year. These moves have been planned to only enhance the education of your child. Movement between sets will still be possible at regular intervals in order to accommodate students developing at different speeds and to place them in the correct set for optimum learning. Teacher assessment and results from interim classroom tests will inform the decisions to move students.

Yours sincerely

Mrs S Strong
Head of Foundation Maths
