Dear Parent/Guardian

Year 9 into 10 Mathematics Set Changes for September 2024

To ensure students make maximum progress during the remainder of their Key Stage 4 course, we will be reviewing and adjusting classes to group students with peers of similar mathematical abilities. These changes will take effect from the start of September and will be reflected in the new timetables issued at the beginning of the next academic year.

The arrangement of the sets will be as follows (subject to change):

- **Sets 1-3:** These sets will follow the higher-tier course.
- **Remaining Sets:** These sets will follow the foundation-tier course, with the possibility of moving to the higher-tier course if success at that level is deemed achievable.

All changes are made with the objective of enhancing your child's education. Movement between sets will be possible at regular intervals to accommodate students developing at different paces and to ensure they are placed in the appropriate set for optimal learning. Teacher assessments, interim classroom test results, and Pre-Public Examinations (PPEs) will inform the decisions to move students.

Thank you for your support and understanding.

Yours sincerely

Mrs A Drazic
Co-Head of KS4 Mathematics

Mrs H Williams
Co-Head of KS4 Mathematics
